

ARENA-COMB

AC SERIES

25-60 HP • 6', 7', 8'

AC SERIES ARENA-COMB was developed for the highest quality arenas that usually have decomposed granite or ground rubber base under approximately 4 inches of quality sand. If the base material is disturbed the arena will be damaged. Thus, two large 8 inch wide adjustable floatation gauge wheels for depth control are mounted in the front. The two rows of heavy-duty vibrating S-tine shanks loosen and aerate the soil. The special 3/4" thick steel comb levels, gauges the depth on the rear of the machine and finish combs the sand.
